NEW TITLES IN BIOETHICS

Annual Cumulation
Volume 29, 2003

(Includes Title Index)
A NOTE TO OUR READERS . . .

Because funds are limited, we are very grateful for your donations, as well as your recommendations to your publishers to forward review copies to the Editor. In addition to being listed here, all English-language titles accepted for the collection will be considered for inclusion in the LOCATORplus database, augmented at the Kennedy Institute of Ethics by contract with the National Library of Medicine. Your efforts to support this publication and the dissemination of bioethics information in general are sincerely appreciated.

NEW TITLES IN BIOETHICS is published four times per year (quarterly) by the National Reference Center for Bioethics Literature, Kennedy Institute of Ethics both as a print and electronic version (http://bioethics.georgetown.edu) beginning with 2004. An annual Cumulation is published in the following year as a separate print publication. In addition, NEW TITLES IN BIOETHICS data is included annually in the BIBLIOGRAPHY OF BIOETHICS. NEW TITLES IN BIOETHICS is a listing by subject of recent additions to the National Reference Center’s collection. (The subject classification scheme is reproduced in full with each issue; it can also be found at the end of the cumulated edition.) With the exception of syllabi listed as part of our Syllabus Exchange program, and documents in the section New Publications from the Kennedy Institute of Ethics, materials listed herein are not available from the National Reference Center. They are available from the publishers listed in each citation. Many titles can also be purchased from Amazon.com.

Subscription to the print edition of NEW TITLES IN BIOETHICS is $25.00 per calendar year in the U.S., Canada, and Mexico, and $35.00 elsewhere. Back volumes are available at $20.00 per volume in the U.S., Canada and Mexico, $25.00 per volume elsewhere. All orders must be prepaid.

This publication is supported by Contract NO1-LM-4-3532 from the National Library of Medicine, National Institutes of Health; and Grant Number P41 HG01115 from the National Human Genome Research Institute, National Institutes of Health. The items cited are provided in part by the grant and contract noted above, as well as by the National Endowment for the Humanities, the Anderson Partnership, the Kampelman Collection of Jewish Ethics, and the publishers and individual donors noted.

FORUM: BIOETHICS AND THE HUMAN GENOME. West Lafayette, IN: C-SPAN Archives, 2001. 1 color videocassette (VHS). (98 mins.) (C-SPAN Program recorded on 22 March 2001 at the Virginia Festival of the Book in Charlottesville, VA. “Panelists discussed medical and genetic ethics. The panelists represented differing schools of thought on the development of bioethics. Discussion ranged from the study of genetics in the last thirty years and the way in which genetic information will be distributed by the medical community in the future to include issues such as biological weapons, informed consent, experimental treatments and euthanasia. After the discussion the panelists fielded questions from members of the audience.” Panel members included Jonathan Moreno, Director, University of Virginia, Center for Biomedical Ethics; James Childress, Professor, University of Virginia; Eric Meslin, Executive Director, National Bioethics Advisory Commission [NBAC]; Allen E. Buchanan, Professor, Philosophy, University of Arizona; Wesley J. Smith, Attorney, International Task Force on Euthanasia and Assisted Suicide; and Doris Teichler Zallen, Science and Technology Studies, Professor, Virginia Polytechnic Institute [VPI].
