NEW TITLES IN BIOETHICS

Volume 35, Number 1
January - March 2009
A NOTE TO OUR READERS . . .

Because funds are limited, we are very grateful for your donations, as well as your recommendations to your publishers to forward review copies to the Editor. In addition to being listed here, all titles accepted for the collection will be included in the ETHXWeb and GenETHX databases, as appropriate, hosted at http://bioethics.georgetown.edu/databases/. Your efforts to support this publication and the dissemination of bioethics information in general are sincerely appreciated.

NEW TITLES IN BIOETHICS is published quarterly by the National Reference Center for Bioethics Literature, Kennedy Institute of Ethics as an electronic version (http://bioethics.georgetown.edu) beginning with 2004. Annual Cumulations were published up until 2005 as a separate print publication. In addition, NEW TITLES IN BIOETHICS data is included annually in the BIBLIOGRAPHY OF BIOETHICS. NEW TITLES IN BIOETHICS is a listing by subject of recent additions to the National Reference Center’s collection. (The subject classification scheme is reproduced in full at the end of each quarterly issue.) With the exception of documents in the section “New Publications from the Kennedy Institute of Ethics,” materials listed herein are not available from the National Reference Center. They are often available directly from the publishers listed in each citation.

Information included in NEW TITLES IN BIOETHICS citations includes: personal or corporate author(s); title; publication source; date of publication; pagination; ISBN or ISSN; other notations (such as donor or series); one primary and (optional) additional secondary NRCBL Classification Numbers; and two-letter (optional) codes which further describe the author’s approach or the content of the item cited. The two-letter codes are: an (analytical), cs (case study), em (empirical), le (legal), po (popular), rv (review), and wh (war and human rights).

The acquisitions cited in this publication have been acquired with the support of the National Library of Medicine, National Institutes of Health, Department of Health and Human Services, Contract No. HHSN276200553501 [and] Grant No. P41 HG01115 from the National Human Genome Research Institute, National Institutes of Health. Other items cited are provided by the National Endowment for the Humanities, the Anderson Partnership, the Kampelman Collection of Jewish Ethics, and the publishers and individual donors noted.

A NOTE TO OUR READERS . . .

Because funds are limited, we are very grateful for your donations, as well as your recommendations to your publishers to forward review copies to the Editor. In addition to being listed here, all titles accepted for the collection will be included in the ETHXWeb and GenETHX databases, as appropriate, hosted at http://bioethics.georgetown.edu/databases/. Your efforts to support this publication and the dissemination of bioethics information in general are sincerely appreciated.

NEW TITLES IN BIOETHICS is published quarterly by the National Reference Center for Bioethics Literature, Kennedy Institute of Ethics as an electronic version (http://bioethics.georgetown.edu) beginning with 2004. Annual Cumulations were published up until 2005 as a separate print publication. In addition, NEW TITLES IN BIOETHICS data is included annually in the BIBLIOGRAPHY OF BIOETHICS. NEW TITLES IN BIOETHICS is a listing by subject of recent additions to the National Reference Center’s collection. (The subject classification scheme is reproduced in full at the end of each quarterly issue.) With the exception of documents in the section “New Publications from the Kennedy Institute of Ethics,” materials listed herein are not available from the National Reference Center. They are often available directly from the publishers listed in each citation.

Information included in NEW TITLES IN BIOETHICS citations includes: personal or corporate author(s); title; publication source; date of publication; pagination; ISBN or ISSN; other notations (such as donor or series); one primary and (optional) additional secondary NRCBL Classification Numbers; and two-letter (optional) codes which further describe the author’s approach or the content of the item cited. The two-letter codes are: an (analytical), cs (case study), em (empirical), le (legal), po (popular), rv (review), and wh (war and human rights).

Note: Beginning in January 2006, NEW TITLES IN BIOETHICS quarterly issues will only be available online at: http://bioethics.georgetown.edu. Annual cumulations will no longer be available as a separate publication, but will be included in each annual volume of the BIBLIOGRAPHY OF BIOETHICS, published each September.

The acquisitions cited in this publication have been acquired with the support of the National Library of Medicine, National Institutes of Health, Department of Health and Human Services, Contract No. HHSN276200553501 [and] Grant No. P41 HG01115 from the National Human Genome Research Institute, National Institutes of Health. Other items cited are provided by the National Endowment for the Humanities, the Anderson Partnership, the Kampelman Collection of Jewish Ethics, and the publishers and individual donors noted.

(“The true story of how, 75 years ago, two men — one the most famous man in the world, the other thought by many to be the world’s smartest — searched for a scientific path to a life without death. In 1927 Lindbergh was the first person to fly non-stop from New York to Paris, a feat most people then thought impossible. In 1930, Lindbergh met Alexis Carrel, then regarded as the most brilliant doctor who ever lived. Lindbergh’s sister-in-law suffered from a heart condition that her doctors deemed hopeless, and he didn’t understand why they could not simply replace her heart with a mechanical pump. Carrel himself was pursuing similar ideas, and a friendship and scientific partnership began, attempting to build a machine that could keep whole organs alive. They thought that this process could potentially render certain chosen human beings immortal.”) [R855.3 .F75 2008a] (20.5.1; 4.5; 5.1; 15.5; 19.1)

A NOTE TO OUR READERS . . .

Because funds are limited, we are very grateful for your donations, as well as your recommendations to your publishers to forward review copies to the Editor. In addition to being listed here, all titles accepted for the collection will be included in the ETHXWeb and GenETHX databases, as appropriate, hosted at http://bioethics.georgetown.edu/databases/. Your efforts to support this publication and the dissemination of bioethics information in general are sincerely appreciated.

NEW TITLES IN BIOETHICS is published quarterly by the National Reference Center for Bioethics Literature, Kennedy Institute of Ethics as an electronic version (http://bioethics.georgetown.edu) beginning with 2004. Annual Cumulations were published up until 2005 as a separate print publication. In addition, NEW TITLES IN BIOETHICS data is included annually in the BIBLIOGRAPHY OF BIOETHICS. NEW TITLES IN BIOETHICS is a listing by subject of recent additions to the National Reference Center’s collection. (The subject classification scheme is reproduced in full at the end of each quarterly issue.) With the exception of documents in the section “New Publications from the Kennedy Institute of Ethics,” materials listed herein are not available from the National Reference Center. They are often available directly from the publishers listed in each citation.

Information included in NEW TITLES IN BIOETHICS citations includes: personal or corporate author(s); title; publication source; date of publication; pagination; ISBN or ISSN; other notations (such as donor or series); one primary and (optional) additional secondary NRCBL Classification Numbers; and two-letter (optional) codes which further describe the author’s approach or the content of the item cited. The two-letter codes are: an (analytical), cs (case study), em (empirical), le (legal), po (popular), rv (review), and wh (war and human rights).

Note: Beginning in January 2006, NEW TITLES IN BIOETHICS quarterly issues will only be available online at: http://bioethics.georgetown.edu. Annual cumulations will no longer be available as a separate publication, but will be included in each annual volume of the BIBLIOGRAPHY OF BIOETHICS, published each September.

The acquisitions cited in this publication have been acquired with the support of the National Library of Medicine, National Institutes of Health, Department of Health and Human Services, Contract No. HHSN276200553501 [and] Grant No. P41 HG01115 from the National Human Genome Research Institute, National Institutes of Health. Other items cited are provided by the National Endowment for the Humanities, the Anderson Partnership, the Kampelman Collection of Jewish Ethics, and the publishers and individual donors noted.
