

Welcome to our unit on **feeding the world in 2050!**

Below is some optional reading for this unit. We invite you to use it for reference and reflection as you proceed through this sequence. Click to open each reading in a separate window or tab: **green** links will open in our coursepack; **blue** ones will open off-site.*

- **John Wilkinson**, Globalization of Agribusiness and Developing World Food Systems
- **H. Charles J. Godfray et al.**, The Future of the Global Food System

When you're done with the unit, feel free to pop into **Office Hours** to ask questions or make other requests related to this week's content!

In our final week of the course, we take a look at what it looks like when bioethics issues cross borders. We've learned so much from our course community, comprised of students from more than 155 countries around the world—we can't wait to explore these last few topics with you.

Let's get started!

Notes

*Alt-text has been enabled to distinguish between coursepack and off-site links for the vision-impaired.
